

## Press release of the FASFC

### **Fipronil : investigation concerning the incoherence in analysis results to be completed - recall regarding 9 codes can be cancelled**

**11/08/2017**

**In the framework of a fipronil contamination of a certain amount of eggs and the analyses carried out on these eggs in the businesses shut down by the FASFC, the Food Agency organized a recall as a precaution on 8 August 2017, because a counter-analysis showed a high level of fipronil different from the first analysis.**

The FASFC immediately launched an investigation together with external experts. In the meantime, this investigation has been completed and the Scientific Committee of the Food Agency has also validated its conclusions so as to preserve impartiality.

The Minister has been informed of the results of this investigation.

The precaution measures can be cancelled on the basis of the investigation and the additional analysis results. Thus, the recall can be lifted for the eggs with the following codes :

- 2BE3084-02
- 2BE3084-03
- 2BE3084-06
- 2BE3123-A
- 2BE3123-B
- 2BE3123-C
- 3BE4004
- 3BE4005
- 1BE8016

The recall remains valid only for the eggs with code **3BE3114**. We would like to remind you that these eggs have already been withdrawn from the shelves.

Consumers can direct their questions to the **free-of-charge number 0800/13.550**. This Saturday, the call center can be reached by phone from 09:00 hrs till 16:00 hrs.
