

FOR THE TEMPORARY IMPORT OF HORSES INTO THE KINGDOM OF SAUDI ARABIA FROM THE EUROPEAN UNION FOR COMPETITION

No. of Certificate:

Country of dispatch:

Ministry Responsible:

I. Identification of the animal

Name	Breed Age Sex	Method of identification and microchip number if available (*)

(*) A passport identifying the equine animal may be attached to this certificate provided that its number is stated.

(a) No of identification document (Passport):
.....

(b) Validated by:
.....
(Name of competent authority)

II. Origin and destination of the animal

The animal is to be sent from:
(Place of export)

Directly to:
(Premises of destination in the KSA.)

By aircraft
(indicate flight number)

Name and address of Consignor:

Name and address of Consignee:

III. Health Information

I, the undersigned, certify that the animal described above meets the following requirements:-

- (a) It comes from a country where the following diseases are compulsorily notifiable: African Horse Sickness, Dourine, Glanders, Equine Encephalomyelitis (of all types including VEE), Equine Infectious Anaemia, Vesicular Stomatitis, Rabies, Anthrax.
- (b) It has been examined today and on the day of loading, or on the last working day before loading, for dispatch and shows no clinical sign of an infectious or contagious disease, is free of external parasites and fit to travel.
- (c) It is not intended for slaughter under a national programme of infectious or contagious disease eradication;
- (d) i) After due inquiry and based on the Declaration of the owner or his representative, the horse has been resident during the 40 days immediately preceding the dispatch, in the country of origin and/or an approved third country. While in an approved third country the horse was held in isolation from horses not of the same health status except during official competition. Approved third countries are United Kingdom, European Union, United States of America, Bahrain, Oman, Qatar, United Arab Emirates, Korea, and Japan
ii) During the 30 days immediately preceding the dispatch, it has been resident on holdings under veterinary supervision.
- (e) It comes from a country in which:
 - i) Dourine has not been reported during the six months prior to dispatch,
 - ii) Glanders has not been reported during the six months prior to dispatch,
 - iii) African horse sickness has not been reported during the last two years and vaccination has not been carried out during the 12 months prior to dispatch,
 - iv) Venezuelan Equine Encephalomyelitis has not been reported during the last two years, and vaccination has not been carried out during the 12 months prior to dispatch;
- (f) It does not come from a holding which was subject to prohibition for animal health reasons nor had contact with equidae from holdings which were subject to prohibition for animal health reasons for the indicated period prior to dispatch of the above described horse:
 - i) During six months in the case of Vesicular Stomatitis,
 - ii) During six months in the case of Equine Encephalomyelitis, beginning on the date on which the equidae suffering from the disease are slaughtered,
 - iii) In the case of Equine Infectious Anaemia, until the date on which, the infected animals having been slaughtered, the remaining animals have shown a negative reaction to an AGID tests carried out on two samples taken three months apart,
 - iv) During one month from the last recorded case, in the case of Rabies.
 - v) During 15 days from the last recorded case, in the case of Anthrax.

OR

If all the animals of species susceptible to the disease located on the holding have been slaughtered or killed and the premises disinfected, the period of prohibition shall be 30 days, beginning on the day on which the animals were destroyed and the premises disinfected, except in the case of Anthrax, where the period of prohibition is 15 days.

(g) The exporting country/region is either African Horse Sickness (AHS) free for the last two years and no vaccination against AHS has been practiced for the last 12 months, or it is an officially recognised AHS Free Country in accordance with OIE definitions. The horse has not been on any premises where AHS has occurred in the past 60 days.

- either it was not vaccinated against African Horse Sickness (1)

OR

- it was vaccinated against African Horse Sickness on(1)(2)

(h) To the best of my knowledge, it has not been in contact with equidae suffering from an infectious or contagious disease in the 15 days prior to this declaration.

(i) It was subjected to the following blood tests:

- i) AGID test for Equine Infectious Anaemia carried out on a sample taken on (2) this being within 30 days prior to dispatch with negative result.
- ii) A complement fixation test for Dourine carried out on a sample taken on (2) this being within 30 days prior to dispatch with negative result at a serum dilution of 1 in 5.
- iii) A complement fixation test for Glanders carried out on a sample taken on (2) this being within 30 days prior to dispatch with negative result at 1 in 5.

(j) During the 90 days immediately prior to but not within 14 days of export, the horse was administered:

either (i) at least two primary vaccinations against Equine Influenza, given between 21 and 42 days apart (3)(4)

First vaccination:.....

Second vaccination:..... (2)(4)

Or (ii) it received a booster vaccination against equine influenza on(2) which was given within 12 months of a primary course or within 12 months of a booster vaccination where it, and any other previous booster vaccinations, had been administered annually within a regular 12 month period since the primary course (3) (4).

*Enter both dates of a primary course or the date of a valid booster vaccination (where applicable). NB Where a booster only is entered, certified proof of previous vaccinations must travel with the horse.

IV INFORMATION ON TRANSPORT

After due enquiry and based on the owners or representative (1) declaration, the transport of the horse has been arranged to ensure that the horse will be sent directly from the premises of dispatch to the premises of destination without coming into contact with other animals not accompanied by the same certificate, in a vehicle cleaned and disinfected in advance with a disinfectant officially recognized in the country of dispatch.

V. The certificate is valid for 10 days.

Date	Place	Stamp (*) and signature of the official veterinarian

.....
(Name in block letters, qualification and title)

(*) The colour of the stamp must be different to that of the printing.

- (1) Delete as appropriate.
- (2) Insert Date
- (3) For KSA import purposes a primary course of vaccinations will be considered to consist of at least two doses of the same vaccine given 21-42 days apart. Consideration will be given to primary courses given at intervals outside these limits but ONLY if it can be shown that they are in line with the vaccine manufacturer's recommendations. The vaccinations against equine influenza must be entered in the passport of the horse.
- (4) All vaccinations must be entered into the passport indicating the date of the vaccination, name and type of vaccine, and batch number, and be signed by the administering veterinarian.

DECLARATION BY THE OWNER OR REPRESENTATIVE

I, the undersigned (insert name in block capitals)
(owner or representative of the animal described above (1))

Declare:

1. The vehicle or container for the transport of the horse from the premises of dispatch to the premises of destination was thoroughly cleaned and disinfected with an officially approved disinfectant and was treated with an officially approved insecticide immediately prior to the loading of the animal.
2. The horse will be sent directly from the premises of dispatch to the premises of destination and during the transportation, the horse will have no contact with animals not accompanied by the same certificate.
3. The horse has been resident in the country of origin continuously for a period of at least 40 days immediately prior to dispatch to the Kingdom of Saudi Arabia, or in an approved third country, and during this period has not been used for breeding. While in an approved third country the horse was held in isolation apart from horses not of the same health status except during official competition or racing.
